Day 44 — Cloud Connector — 01/09/2026

* Must and Should about cloud Connector
* Question: What is firewall? (network layer)

To make the data secure.

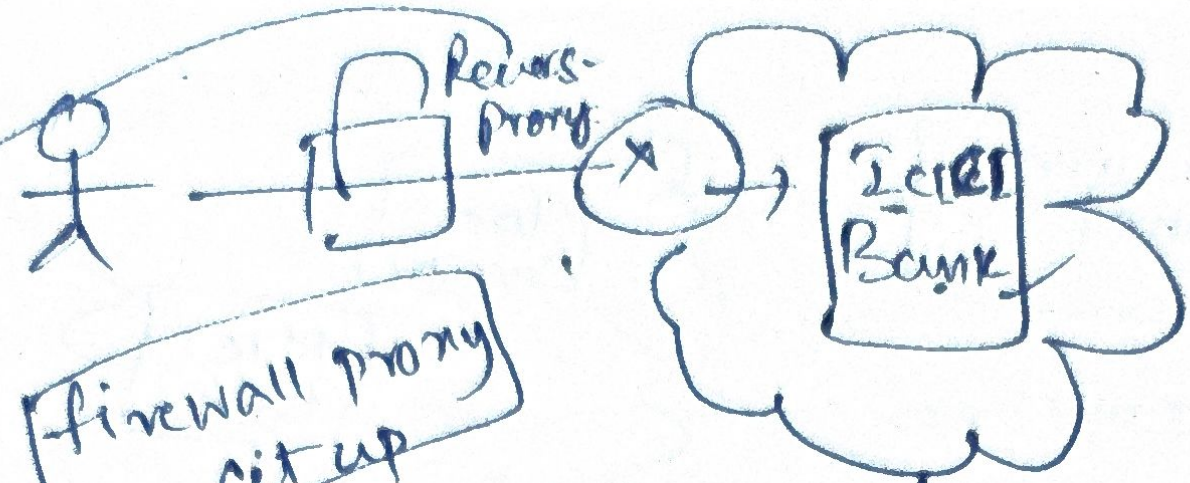

Eg:

① Inbound request - cpi to ICICI Bank

② outbound ~~request~~ ICICI to cpi process Connections

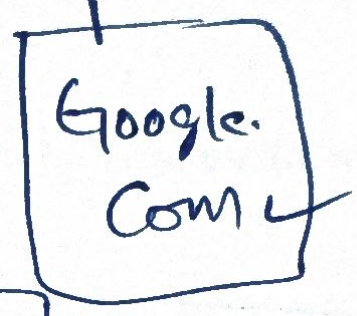

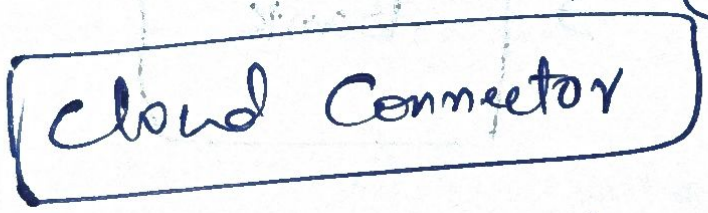

Proxy ~~set~~ Setup is only used ~~for~~ outbound ~~req~~ Connections

Eg: ICICI Server to google server

Temperorily Bypassing the connections

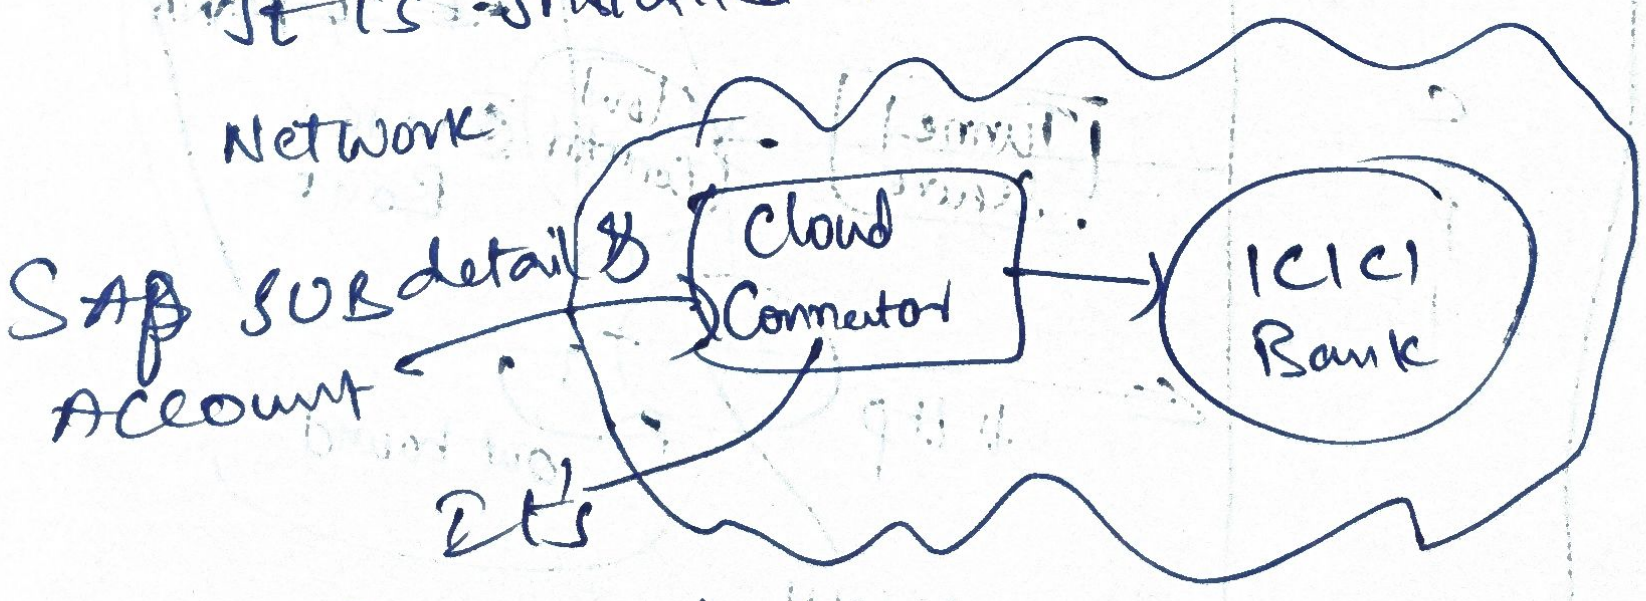

from Any server → Cloud connector → required System or) server

↓

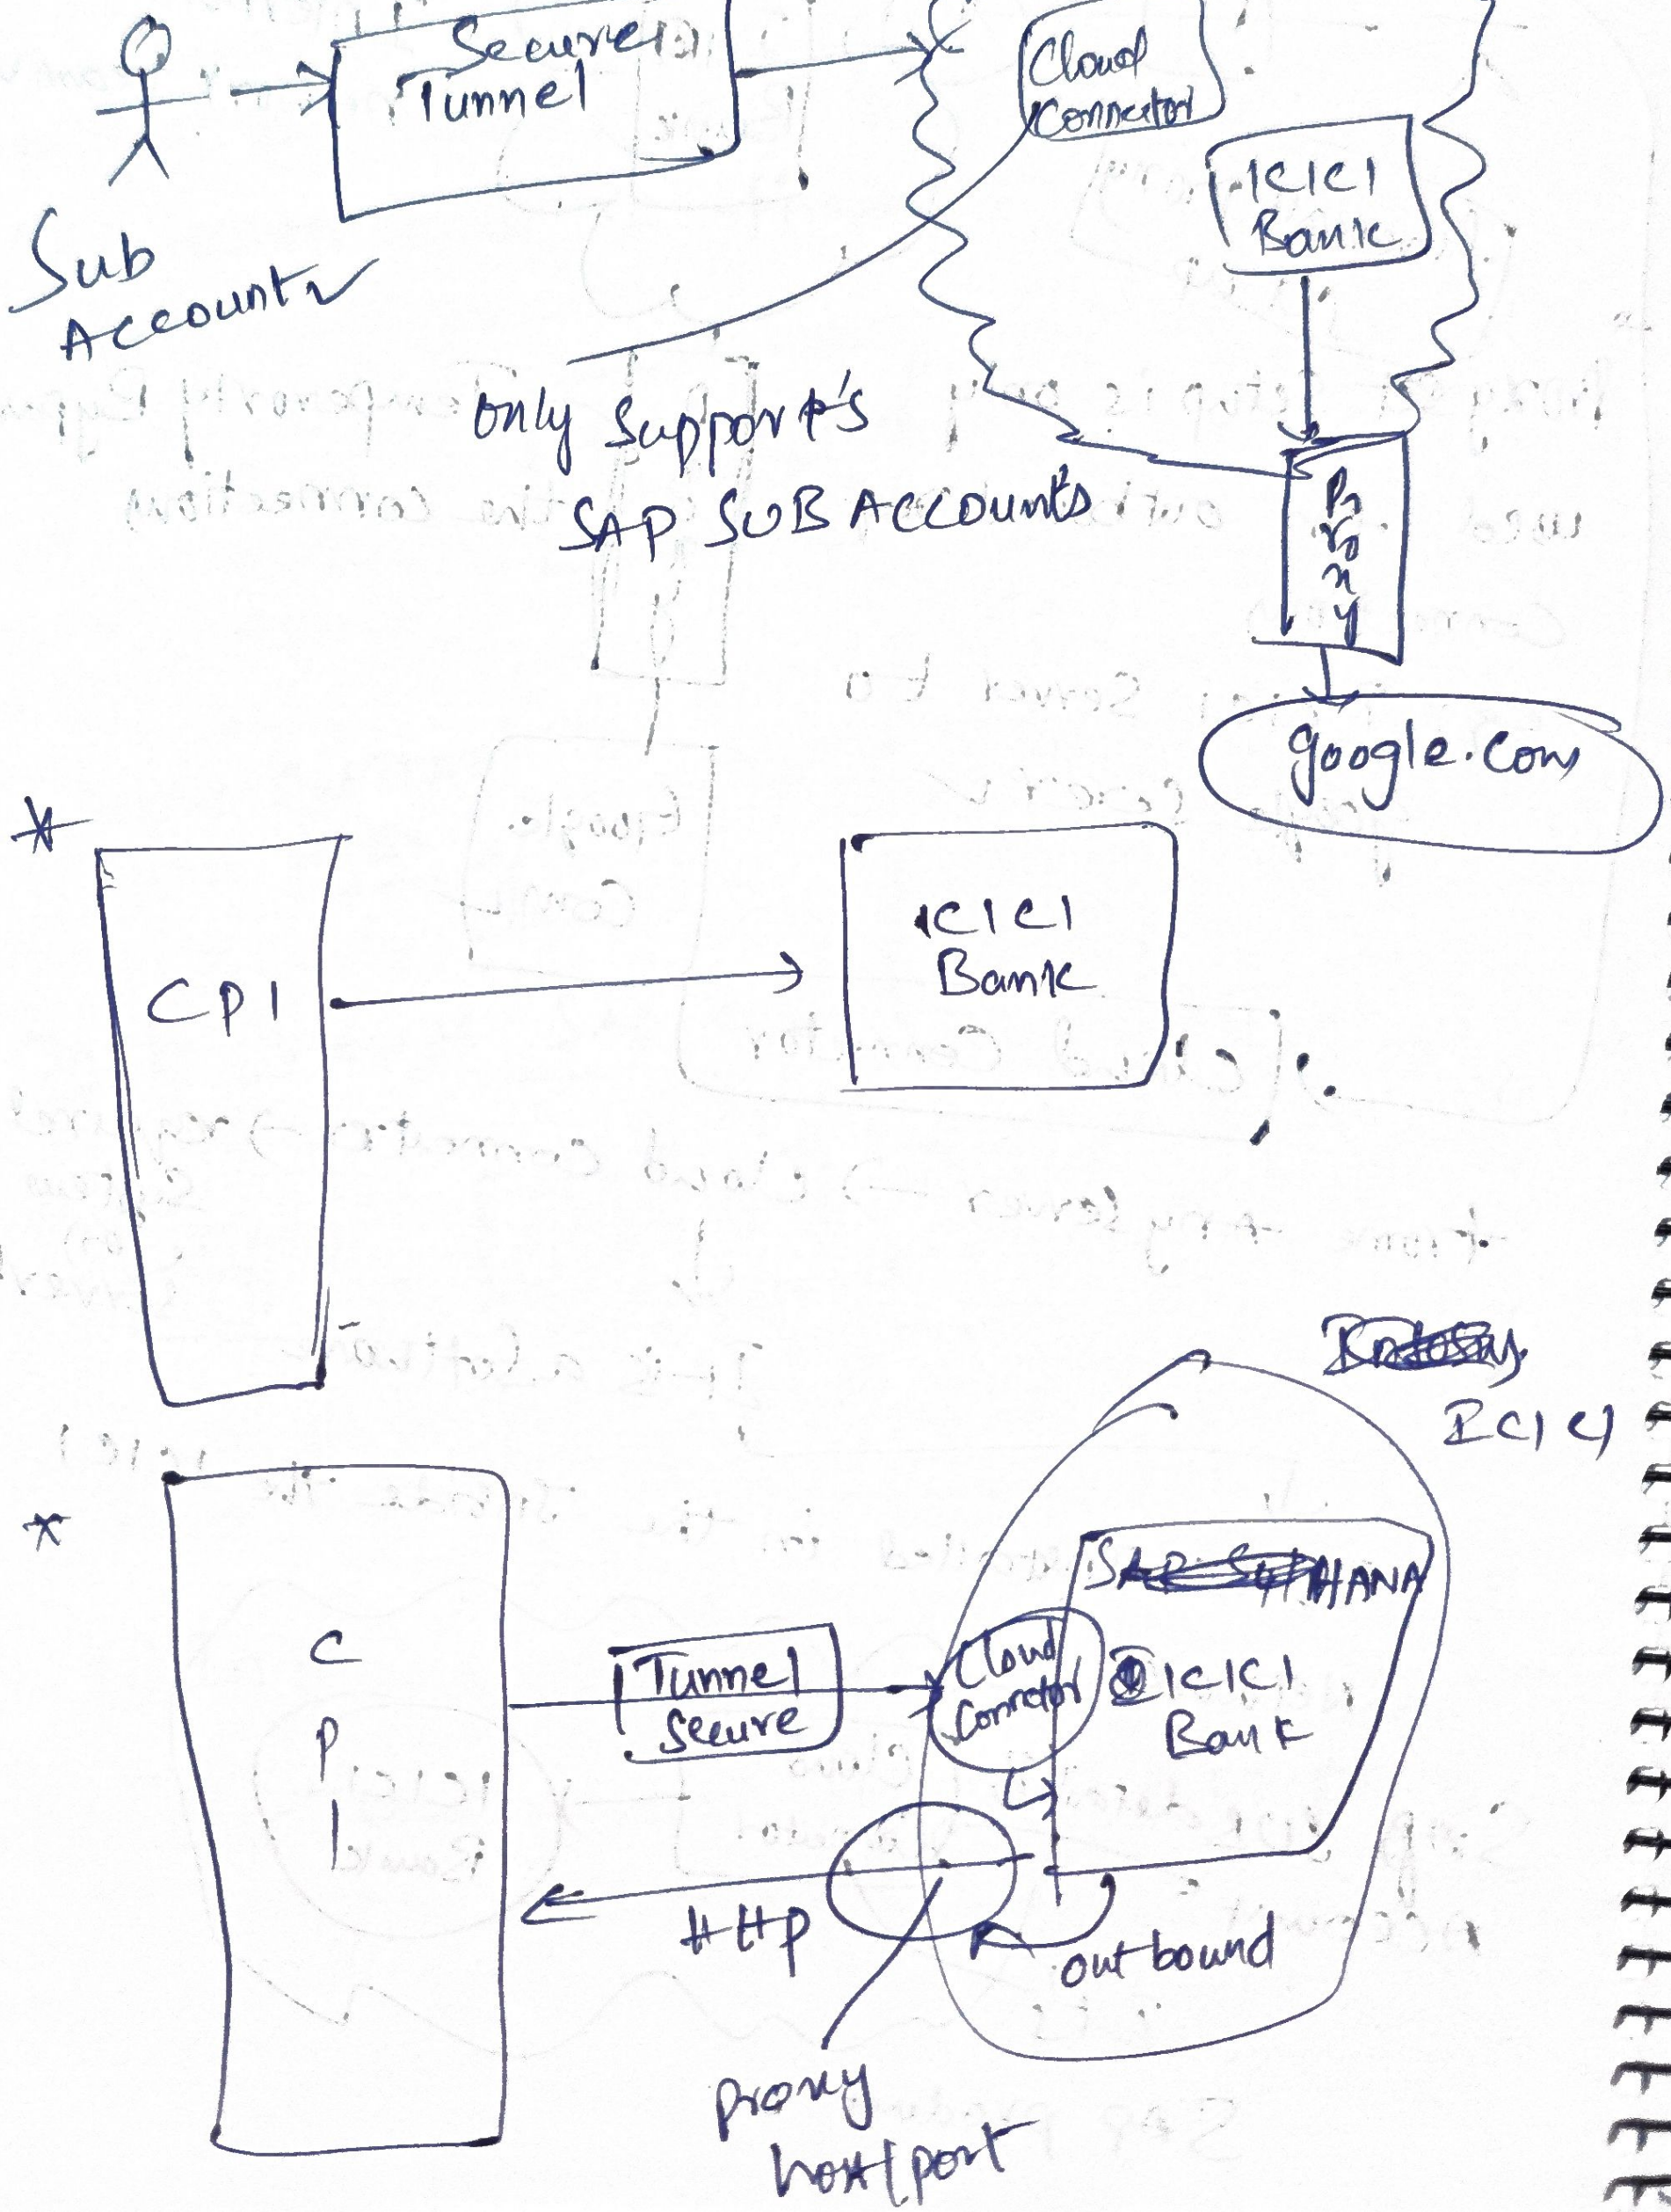

It is a Software

↓

It is Installed in the Inside the ICICI Network
