

* Manual Import & Export → Dev, QA, etc

* CTS ⇒ Services → Cloud Transport management
'We need to Subscribe'

* In Real time Company management will direct

SAP BTP Integration Suite URL

* About Components

→ Home, Discover, Design, Modernize, monitor
Inspect, Comp Settings

* Here the main Reason why the Companies are using it is due to it has DISCOVER Tab

→ Discover ⇒ Standard packages & flow's (or)

↳ It has already designed

Packages & Integration flow's

⇒ Eg: I want to create "FEDEX SCREEN" for customers

* Field's that we may need to have are

① Customer ID

⑤ Address.

② Name

③ Phone number

④ gmail

Competitors → DHL, UPS, etc

⇒ When we observe above two examples

for FedEx & DHL, UPS etc

All the companies required the same fields as mentioned in the 1st Example

* Different Companies: logistics, oil and gas, manta, pharma

* Here mainly we are discussing about Predefined

Packages

* About Package: It is kind of folder
Inside that package we will have flows

called as Integration flows

* Discover: In this components we can find pre defined packages that are provided by SAP

* Design: Custom Integrations (we will create)

* monitor: Provide Realtime Status dashboard for Core Integration Infrastructure
